## 1 Executive Summary

Write something here

## Disclaimer

The opinions and views expressed in this manuscript are those of the author, and do not necessarily state or reflect those of any institution or government entity.

### 2 Introduction

How the author got interested in K-Pop music (Korean popular music):

Tzuyu (Chou Tzu-Yu, 周子瑜)1

(a lot more content here)

Important: Write about the K-Pop scandal revealed in 2019 and later.

#### 2.1 Read in the Idol School Dataset

Idol School (偶像學校) (2017)

Motivation: One of the contestants, Snowbaby (蔡瑞雪),<sup>2</sup> is originally from Taiwan.

Need to write the data description

## 2.2 Idol School: Exploratory Data Analysis

What changes did we make from the Wikipedia data?

Our presumption: In each category, no two contestants should have the same score.

Physical: We found two 3.5's and two 1.2's after sorting the scores.

The two 3.5 scores belong to adjacent cells in the Wikipedia data.

Physical testing contains a group exercise and an individual exercise.

In the video clip, Park Ji Won (朴池原) and her partner were the first runner-up in the group exercise.<sup>3</sup> We are surprised that Ji Won's physical score was only 3.5. According to the video's score table for contestants ranked 11th to 20th,<sup>4</sup> Ji Won's physical score should be 6.2.

The Wikipedia table contains some inconsistency in the overall score, i.e., the average across the three categories.

Ji Won's vocal score was 7.9, and her dance was 5. These scores seem to be reasonable for Ji Won, because she is known for excellent singing and decent dancing as a performer.<sup>5</sup> Therefore, we assume both scores to be correct.

• If the physical score had really been 3.5, then Ji Won's overall score would be 5.47, dropping her from 13th place to the 18th.

 $<sup>^3 \</sup>rm Screen$ shot of the group physical exercise: https://bit.ly/4a7QT9m

<sup>&</sup>lt;sup>4</sup>https://bit.ly/400KUhH

<sup>&</sup>lt;sup>5</sup>Park Ji Won is the main vocalist in Fromis 9. https://bit.ly/402yCFI

• If the overall score of 6.37 had been correct, then Ji Won's physical score should be 6.2.

The second scenario is more likely.

Evidence we found in the video clip.

The two 1.2 scores are more difficult to check for the underlying values.

Especially that they occurred in two contestants with lower ranking.<sup>6</sup>

With the help of Google Translate:<sup>7</sup>

Can translate Korean text in an image back to English text.

Finally, we discovered that Michelle White (懷特·米雪兒)'s physical score should be 1.3, not 1.2.

## 3 Tentative Placeholders

Write something here

### 3.1 Test for Non-English Characters

```
CJK = Chinese, Japanese, Korean
Chinese example
RStudio 有辦法打中文嗎?
```

```
print("大家好,很高興能認識你們!")

## [1] "大家好,很高興能認識你們!"

Japanese example
思い出にするにはまだ早すぎる

print("みやわき さくら")

## [1] "みやわき さくら"

print("宮脇 咲良")
```

This template does not support Korean characters yet.

#### 3.2 R Markdown Narrative

## [1] "宮脇 咲良"

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

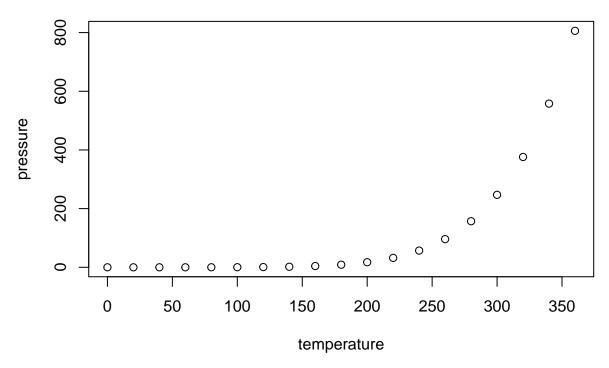

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##
        speed
                         dist
##
    Min.
           : 4.0
                   Min.
                           : 2.00
                    1st Qu.: 26.00
##
    1st Qu.:12.0
   Median:15.0
                   Median : 36.00
##
           :15.4
                           : 42.98
##
    Mean
                   Mean
    3rd Qu.:19.0
                    3rd Qu.: 56.00
##
##
    Max.
           :25.0
                   Max.
                           :120.00
```

## 3.3 Including Plots

You can also embed plots, for example:

Note that the echo = FALSE parameter was added to the code chunk to prevent printing of the R code that generated the plot.
